Informed consent to Naturopathic Therapeutic Procedures

Naturopathic medicine is the treatment and prevention of diseases by natural means. Naturopathic doctors (ND) assess the whole person, taking into consideration physical, mental and emotional aspects of the individual. A number of modalities are used by the ND and your treatment may include the following:

Nutrition: This may include individualized diets and nutritional supplements for treatment or prevention.

Asian medicine: This may include acupuncture, cupping, diet therapy, herbs and other hands on therapies to balance body functions. Acupuncture treatments are performed using sterilized single-use needles.

Lifestyle counseling: Lifestyle habits contribute to health. The ND will help you identify risk factors and make recommendations to help you optimize your physical, mental and emotional environment.

Botanical Medicine: The use of plant based medicines and compounds to treat conditions.

Homeopathy: Remedies made from minute does of natural substances may be recommended to increase the body's ability to heal itself and attain balance.

Physical medicine: Refers to the use of hands-on techniques to bring about healing in the body.

Diagnostic tests: When appropriate, the ND may recommend tests. Tests may be carried out in-house or some cases you may be referred to your medical doctor or other professional for additional tests.

Hypnotherapy: Dr. Ling is a certified hypnotherapist. Hypnosis techniques may integrated with your naturopathic treatments. Patients learn self-hypnosis techniques to enhance relaxation, reduce stress, help change habits and even improve self-confidence. To be a certified hypnotherapist, one must receive training that is approved by the National Guild of Hypnotists.

Even the gentlest therapies may be contraindicated in conditions such as pregnancy and lactation, in very young children, those with compromised immune functioning or those with multiple medications. Some therapies must be used with caution in certain conditions such as diabetes, heart, liver or kidney disease. Therefore, it is very important that you inform the ND immediately of any condition that you are suffering from and if you are on any medication. If you are pregnant or you are breast feeding, advise the ND immediately.

Any medical treatment carries possible health risks. In naturopathic medicine these may include, but are not limited to: Aggravation of a pre-existing condition; Adverse reactions to supplements and herbs; Pain, bruising or injury from acupuncture, injections or other administrated tests

I,_____, do hereby acknowledge and I have been informed of and understand the recommended naturopathic therapeutic procedures as listed above and have discussed with satisfaction this and any related information with the ND named below. I understand that the ND will answer my questions, to the best of her ability, regarding all therapeutic procedures with respect to financial costs, expected benefits, potential risks and side effects; the likely consequences of not having/ following the procedure(s)/ plan, and what alternative course(s) of action are available to me.

I further understand that Total Wellness Centre will keep a record of all health services provided to me. This record will be kept confidential and will not be released to others unless so directed by myself or required by law in accordance to the clinic's Privacy Policy.

As a result, I do hereby voluntarily consent to naturopathic treatments for my conditions from time to time. I understand that I may withdraw my consent at any time and in doing so I understand that I will not continue to receive naturopathic treatment.
